THINK AHEAD! TAKE A KNOWLEDGE JOURNEY.

By the 1930's, the world's cumulative information base doubled every 30 years. By the 1970's, this rate shrunk to 7 years. By the year 2010, the information base of the world, will double every 11 hours! Information bombardment is the single most challenging threat facing knowledge workers. But, it doesn't have to be this way. Learn how to transform this threat into a sustainable competitive advantage for you and your firm.

THE ULTIMATE PERFORMANCE ACCELERATING ACTIVITY FOR TEAMS

Employees spend in excess of 50% of their time looking for answers and then spend 20% of their time replicating answers for others. Is your team suffering from the same dilemma? High performance teams are supposed to harvest the synergy embedded in all of their members to create value above and beyond what each person could do on their own. Achieve your team's full potential through knowledge sharing and collaboration.

A COMPETITIVE EDGE FOR LEADERS

The average Fortune 500 company loses \$64 million dollars a year because of ineffective knowledge sharing. Organizations that harvest intellectual capital through knowledge management initiatives attain the ultimate competitive advantage. But how does a leader prioritize which investments are worth making? Embrace the decision-making power of causal maps which clearly show you what to do, when to do it and what to expect in return.
